Q1(b) Dual function: concave, maximised at $\mu^\star = 2$
where $d^\star = p^\star$ (zero duality gap)
$\mu^\star = 2,\ d^\star = 1$
$p^\star = 1$
duality gap
$p^\star - d(\mu)$
$d(\mu) = \mu - \mu^2/4$
$d(\mu) = \min_x L(\mu, x)$
